- Pedigree Season 2025 -

BUCKFAST Breeder

No. B103(RS)= .24-B105(RS) krw B23(SP): .23-B105(RS) sdw M470(EN): .22-B9293(CHU) hbg B646(JtB): etc.
old faithful, robust and prolific

No. B1(RS)= .23-B33(RS) sdw M470(EN): .22-B15(RS) krw B307(JtB): .20-B46(RS) amm B18.2-18(KK) etc.
main line

No. B36(RS)= .24-B1(RS) amm B5712(LS): .23-B33(RS) sdw M470(EN): .22-B15(RS) krw B307(JtB): etc.
main line, next gen

No. B40(RS)= .24-B1(RS) amm B5712(LS): .23-B33(RS) sdw M470(EN): .22-B15(RS) krw B307(JtB): etc.
main line, next gen

No. 4(RS)= .22-11(RS) random : .20-11(RS) random : no more details available
random mated in 4th gen, fine behaviour, unclear offspring

Drones, Mating Station **Karwendel**: Daughters of

No. J41(IC) = .22-J829(IC).21 bal B2(TR).20 : .21J697(IC).19 bal B856(IC).19: .19 - J359(IC).17 bal B84(TR).17: etc.

Comment by the breeder of the drone line:

“The HO-Jemenitica bees that were on Baltrum in 2024 did not receive treatment until the beginning of September. They had only just arrived from Baltrum Island! No drone brood removal was necessary! After treatment, an average of 200 mites fell and we had no virus damage in the colonies. 5-7 brood combs and healthy bees. Wow! And yesterday I sprayed them, all there on 5-8 combs! Of course, no swarming, large colonies and lots of honey, uniform inheritance and gentle, no bridges – just awesome! I gave one of the sisters of the queens that were used in the drone colonies on Baltrum to the Buckfast Beekeepers Association of Bavaria.

I received the HO-Jemenitica from Horst Preissl and Hansi Neuburger in 2013 during a visit with Thomas Rüppel in Austria. She was very sensitive to smoke and when you looked inside, all the bees looked at me. The bees were small with protruding wings and calm. They were always mated on Baltrum and only bred from queens that were uniform in phenotype. The result is the perfect bee for our commercial beekeeping. Stable inheritance! Well, what more could you want?”

Used for:

x J41: all

Auswertung der Zuchtmütter Saison 2025 (Anlage zur Pedigree)

Breeder number	Year of birth	offspring	Vitality bees	Vitality brood	Temper	Swarm tendency	Fecundity	Crop Spring	Crop Forest	Over-wintering	Building combs	Propolis	Hyg+ 8 h % double tested	ZW

Bewertung nach Br. Adam:

6 = ein extrem seltener positiver Ausnahmefall

5 = sehr gut

4 = entspricht gut den Anforderungen

3 = eher unterdurchschnittlich und unbefriedigend

2 = schlecht, kann nicht durch eine andere Eigenschaft kompensiert werden

1 = einfach sehr schlecht
